DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on September 29, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Number 6,662,605 and U.S. Patent Number 6,354,119 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 29-49 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a latch assembly having a base with a recessed working channel, an aperture, and a stop positioned in the working channel, a shaft extending through the aperture, the shaft has a rotational limiter being positioned in the working channel where the stop is separated from the rotational limiter, and a handle fixed to the shaft, where the handle has a protruding positioning member that is constructed for movement between the stop and the rotational limiter.

U.S. Patent Number 6,662,605 to Molzer discloses a substantially similar latch assembly. However, Molzer fails to disclose the stop is separated from the rotational limiter within the working channel, and the protruding positioning member being constructed for movement between the stop and the rotational limiter.

Art Unit: 3676

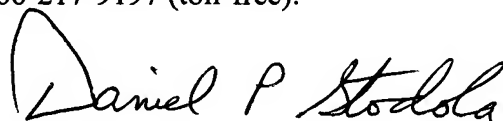

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
